

Carbon Reduction Report

Company Name: Safer Sphere

Publication Date: March 2026

Commitment to Achieving Net Zero

Safer Sphere is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are the quantified greenhouse gas (GHG) emissions associated with our organisation's activities prior to the implementation of emissions-reduction initiatives. This baseline establishes the reference point against which subsequent emissions performance and progress in reduction are measured and evaluated.

Emissions

Emissions are reported in Metric Tons.

Baseline Year

Additional details relating to the 2021 Baseline Emissions calculations

The baseline emissions for the year 2021 represent the organisation's typical emissions profile and serve as the reference point for reporting across subsequent years from 2021 to the present. The organisation maintains a minimal supply chain, limited primarily to the procurement and operational use of IT equipment and software.

Baseline year emissions - 2021

Scope 1	14.14 mtCO2e (Personal car) 8.84 mtCO2e (Train, Tube, Bus, Tram, Taxi, Flights)
Scope 2	0.4 mtCO2e (Office utilities)
Scope 3	0.097 mtCO2e (Waste)
Total Emissions	23.477 mtCO2e
Total Emissions per FTE (19)	1.24 mtCO2e

Current Emissions Reporting - Reporting Year 2025

Additional details relating to 2025 Emissions calculations

In 2025, Safer Sphere experienced significant growth, with its workforce increasing from 60 to 97 employees across the year. This expansion, coupled with a higher number of projects, led to increased business travel and associated carbon emissions. Additionally, the company's first full year in the larger Head Office resulted in higher electricity and gas usage, further contributing to its operational carbon footprint. These developments reflect how our business growth directly influences resource consumption and greenhouse gas emissions, highlighting opportunities for targeted sustainability measures.

Scope 1	23.72 mtCO2e (Personal car) 4.44 mtCO2e (Train, Tube, Bus, Tram, Taxi, Flights)
Scope 2	13.74 mtCO2e (Office utilities)
Scope 3	0.22 mtCO2e (Waste)
Total Emissions	42.12 mtCO2e
Total Emissions per FTE (97)	0.43 mtCO2e
